

2500 EAST RECONSTRUCTION

From: Foothill Drive to 2100 South

OVERVIEW

During the 2019 road construction season, Salt Lake City will reconstruct this section of 2500 East, including Downington Avenue, from Foothill Drive to 2500 East. We have coordinated the reconstruction of these two streets into one project to maximize resources and minimize inconvenience to residents. The project will replace the asphalt pavement to extend its lifespan and to improve drainage conditions and travel experience. Project features include new paint for existing markings, upgrades to access ramps, and repairs to curb and gutter, drive approaches and sidewalks as needed.

PROJECT VALUE

This project was made possible via a \$400,000 investment from the Class C Fund.

PROJECT SCHEDULE

March through July 2019 | *Subject to change due to weather or unforeseen circumstances.
